Any pieces smaller than 4x4cm are 60c each

Width (cm)

For **only** bisque firing then pay 40% of the above charge  
For **only** glaze firing then pay 60% of the above charge

To calculate the width of a piece that is **NOT** round or square then add together the width and depth of the piece and divide in half, this is the average width of the work and is used in calculating the firing charge.
